

**A simple knowledge graph app
aimed for
individuals, couples and businesses,
to see their income and expenses clearly,
with AI-supported features,
to ease money tracking fatigue and
better manage their expenses digitally & wisely.**

HoneyMoney.app

The Problem We Solve

Managing expenses in Malaysia can be challenging due to the need to juggle multiple e-wallets such as TNG, MAE, GrabPay, and ShopeePay. This fragmentation makes it difficult to track spending effectively without a unified app or solution tailored for Malaysian families and businesses.

Moreover, poor financial management is a major source of household conflicts and can negatively impact individual productivity as well as overall business performance.

Our Solution, The 3-Bucket Method

Must-Pay Bucket

Rent, bills, and daily essentials as shared costs are visible to both partners, keeping everyone aligned on what must be paid.

Future Shield

Automatic savings set by percentage — money flows into your Future Shield before you can spend it, building security effortlessly.

Private Wallets

Personal money stays personal. Each partner keeps autonomy over their own wallet — no tracking, no judgment, full privacy.

Product Experience

"Add a spend in seconds,
forward a screenshot,
scan a receipt, or voice it out.

No bank link needed.

Our HoneyMoney.app simplify the way to
monitor and track spending needs."

Easy Spend Addition

Forward e-wallet screenshot to Telegram bot, scan a receipt, or use voice input. No bank link required.

Multi-Language & Currency

Supports multiple languages and currencies so every family member can use it comfortably.

Dashboard & Money Views

Multiple ways to view your expenditure. Spending by day, week, and month with forward-looking forecast built in.

AI That Helps, Not Judges

Optional AI tracks every cost, spots overspending early, and nudges — without revealing private wallets.

Architecture & AI-Support

Business Model

Growth Strategy

Free for families to encourage broad adoption. Growth through family invitations and community groups, with guided setup for simplicity and peace of mind.

Revenue Model

Employers pay to offer HoneyMoney as a staff wellbeing benefit. Supported by Cradle CIP Spark grant with no equity given — sustainable from day one.

Key Numbers

100% profit margin due to very low running costs. Employer-paid seats fund the business. No competitors serving Malaysian couples across multiple e-wallets.

Scales Lean, Impacts Wide

Bottom-up Approach

A flexible app for individual, household and small businesses' cashflow **Finance Tool**.

TAM Total addressable market

$$\sim \$5,500 \times 50k/4 = \text{RM270M} \nearrow$$

SAM Serviceable addressable market

$$\sim \$M \times 50k/4 = \text{RM20M}$$

SEED GOAL: RM100K

Why us:

Address commercial solutions gaps with

- multi-persona considerations, flexible usage for individual, couples, families, and small businesses
- Free tier - zero billing for AI-powered insights + one-for-all expenditure visualisation app
- Works offline, mobile-first with Malaysian context, and user friendly

Development Roadmap

YEAR 1

MVP → PMF

- 1,000 households, soft-launch
- Single-city, early KPIs

YEAR 2

Scale

- National rollout, 50k users
- Revenue from premium tier

YEAR 3

Expand

- Move to ASEAN B2B
- High-value fintech

Role of capital

This pre-seed round gives us a single-city pilot to enterprise-grade model among every recurring platform in real-time for **18 months**.

Current Status

Live App

Public app live at honeymoney.app, real build, no backdated code
