

HoneyMoney.app

Happy Wife . Happy Life

MAIC Nexus 2026 | Track T3

The Problem

Managing the rising cost of living in Malaysia is hard when people juggle many e-wallets and daily expenses like TNG, MAE, GrabPay and ShopeePay alongside other daily expenses. This fragmentation makes it difficult for individuals, couples and families to clearly track their spending without a single, unified app.

Our solution turns messy, spreadsheet-style budgeting into a simple, personalised “3-bucket” money flow that shows what is fixed, what is saved and what is truly personal, removing tracking fatigue and frustration.

Our Solution, The 3-Bucket Method

Must-Paid

Rent, bills and daily essentials are treated as shared costs that both partners can see, keeping both sides aligned on what must be paid.

Savings

Automatic savings are set by percentage, so money flows into your savings before you can spend it, building security effortlessly.

Privacy

Personal money stays personal. Each partner keeps autonomy over their own wallet, no tracking, no judgment, full privacy.

Product Experience

Add a spend in seconds,
forward a screenshot,
scan a receipt, or voice it out.

No bank link needed.

Our HoneyMoney.app simplify the way to
monitor and track spending needs.

Easy Addition

Forward e-wallet
screenshot to Telegram bot,
scan a receipt, screenshots,
or use voice input.
No bank link required.

Language & Currency

Supports multiple
languages and currencies
so every family member can
use it comfortably.

Dashboards

Multiple ways to view your
expenditure. Spending by day,
week, and month with forward-
looking forecast built in.

AI That Helps, Not Judges

Optional AI tracks every
cost, spots overspending
early, and nudges, without
revealing private wallets.

Architecture & AI-Support

Business Model

Growth

Free for all to encourage broad adoption. Growth through consumers, couples, family invitations and community groups, with guided setup for simplicity and peace of mind.

Revenue

HoneyMoney.app earns from sponsorships and curated supplier ads, plus optional premium plans for users who want more insights.

Profit

High profit margin due to very low running costs. Underserved Malaysian couples segment with high potential.

Scale & Impact

- **Regional Growth:**

Helps people manage money better with more clarity, starting in Malaysia and ready for regional growth.

- **Benefits & Impact:**

Clear financial expenses for consumers, couples and families. Supports users without full bank access.

- **Low-Cost & Resilient:**

Data stored on user device. AI provider switching (Gemini, Groq, Deepseek, Qwen, Ollama & OpenAI) avoids lock-in and controls costs.

- **One Engine, All Users:**

One system fits consumers, couples and families, no separate builds needed.

Benefits

A flexible app for consumers, couples and families' cashflow visualisation & analysis tool:

- Multi-persona considerations, flexible usage for consumers, couples, families, and small businesses
- Free tier - zero billing for AI-powered insights + one-for-all expenditure visualisation app
- Works offline, mobile-first with Malaysian context, and user friendly

Development Roadmap

YEAR 1

MVP → PMF

- 1,000 households, soft-launch
- Single-city, early KPIs

YEAR 2

Scale

- National rollout, 50k users
- Revenue from premium tier

YEAR 3

Expand

- Move to ASEAN B2B
- High-value fintech

Role of capital

We target a single-city pilot to enterprise-grade model among every recurring platform in real-time for **12 months**.

Current Status

Live App

Public app live at honeymoney.app, real build, no backdated code

Dashboard

Dashboard Expenditure: by day, week, month and forecast

Spending

Add spending details via text, voice, and/or receipt scan

Analytics

Visual Analytics on income versus spending, for insights

AI Tracking

Admin view to track every cost and records

Our Team - JUST50

Drives business strategy, partnerships, and growth. Focused on making HoneyMoney.app the go-to expenditure tracking app for Malaysian consumers, couples and families.

Chua Kia Wah
Business Lead — Malaysian Citizen (MyKad)

Architects the platform, from the local-first knowledge graph to AI integrations and supporting features, while keeping the system lean and resilient.

Pong Woon Wei
Tech Lead — Full-Stack & AI Engineer

- ***Pilot with consumers, couples and families to use the app as a spending and wellbeing benefit.***
- ***Use advanced fintech and AI features, and connect with impact-driven partners and investors.***
