

HoneyMoney.app

Happy Wife . Happy Life

The AI money layer for Malaysian Families

MAIC Nexus 2026 | Track T3

The Problem

Malaysian households run their money across four or five e-wallets — TNG, MAE, GrabPay, ShopeePay — plus cards and cash. Nothing adds them up.

So people fall back on spreadsheets, or they stop tracking altogether. For couples it is worse: no shared view of what must be paid, and no private space for what shouldn't be shared.

The result is not a data problem. It is a decision problem. Households find out they overspent after the money is gone.

Live Now

LIVE NOW, NOT A CONCEPT

Live App

Public app live at honeymoney.app, real build, no backdated code

Dashboard

Dashboard Expenditure: by day, week, month and forecast

Spending

Spending Add via text, voice or receipt scan

Analytics

Analytics Visual analytics on income versus spending

AI Tracking

AI Tracking Admin view tracking every cost and record

The 3-Bucket Method

with a Score that Tells You if it Works

Where our money goes

Must-Paid

Rent, bills, essentials. Shared and visible to all , so nobody guesses what still outstanding this month.

Savings

Savings Set as a percentage, moved before it can be spent. Security without willpower.

Privacy

Personal money stays private, no tracking, no judgment, no exceptions.

How our money works

Health Score

Fail . Pass . Good . Excellent

Product Experience

Add a spend in seconds,
forward a screenshot,
scan a receipt, or say it out loud.
No bank link.
No forms.
No spreadsheet.

Easy Capture

Forward an e-wallet
screenshot to the Telegram
bot, scan a receipt, or use
voice.
No bank connection required.

Language & Currency

Multiple languages and
currencies, so every family
member can actually use it.

Dashboards

Spending by day, week and
month, with forward-looking
forecast built in.

Sees It Coming

The forecast doesn't just
report. It warns: "Short by
the 24th at this pace, RM120
less on dining fixes it."

Architecture & AI-Support

1

LAYER 1

Next.js Progressive Web App

Lightweight frontend, works on any device, nothing to install.

2

LAYER 2

PocketBase,

Self-hosted, single-tenant, no third-party processor, encrypted at rest

3

LAYER 3

Telegram Bot + API

Screenshots, receipts, voice. Multilingual, multi-currency. No bank connection needed.

4

LAYER 4

Switchable AI,

Switchable AI Gemini Flash, Groq, Ollama, DeepSeek, Qwen and others. Cost tracked per call. No vendor lock-in.

Cost-free AI calls within allowable limit as a start, e.g., Google \$300 AI free-credit

Market & Traction

Market Size:

Million Malaysian households.

Million dual-income couples, the segment where shared-vs-private money is a live, daily friction.

Gap:

Existing tools serve one of two ends: bank apps that see only their own bank, or spreadsheets that see everything but require discipline nobody sustains.

Where We Sit:

The daily-use of every wallet, with a couple-aware privacy model that a bank-owned app structurally cannot offer.

Traction:

[Users] · [Weekly active] · [Retention or growth rate] · [Other]

Business Model

Strategy & Growth

Now, our Free Tracking, 3-bucket method, Money Health Score, forecasts.
Free for everyone, forever.
This is the acquisition engine.

Revenue & Profit

Health score stays on-device.
If the user chooses to explore a product,
we route to licensed partners and share the
commission as rewards and profits.

Development Roadmap

Pilot Phase 1 (6-12 mth)

- 1,500 households soft-launch, target 500 seats
- Early retention KPIs

Scale Phase 2 (12-24 mth)

- National rollout, 12k household, target 8k seats
- Revenue from premium tier

Expand Phase 3 (24-26 mth)

- ASEAN market, 45k household, target 30k seats
- High-value fintech

The Ask

We are raising RM150k to fund 18 months of runway, taking us from a live product with targets below:

500 seats x RM48 = RM24k (1st Yr);

8,000 seats x RM48 = RM348k (2nd Yr);

30,000 seats x RM48 = RM1.44mil. (3rd Yr)

Use of funds: 60% engineering · 25% Employee · 15% Sdn Bhd Incorporation & Expenses.

Our Team - JUST50

Drives business strategy, partnerships, and growth. Focused on making HoneyMoney.app the go-to expenditure tracking app for Malaysian consumers, couples and families.

Chua Kia Wah
Business Lead | Malaysian Citizen

Architects the platform, from the local-first knowledge graph to AI integrations and supporting features, while keeping the system lean and resilient. AI-award-winning Tech Lead.

Pong Woon Wei
AI Tech Lead | Full-Stack & AI Engineer

- ***Pilot partners: employers and community groups offering HoneyMoney as a wellbeing benefit***
- ***Licensed fintech partners for the Year 3 referral layer***
- ***Impact-driven investors***
